Wilhelm Scream is the greatest Easter egg film of all time. Here's the origin behind the sound effect, including how Star Wars popularized it. Wilhelm Scream is the biggest Easter egg movie in history, but many people can't know where it came from. The truth may surprise you that the chick does not come from a person, character, or movie involving the name Wilhelm. Instead, commonly heard screams have a complicated origin involving sound bytes and popularized by Star Wars. To get to the bottom of the Wilhelm Scream creation, one must go back to 1951, when Distant Drums tries Gary Cooper to be released. One of the scenes in the film featured the heroes crossing a lake that had alligators in it. While the main characters of Distant Drums survive the trek, not everyone in the party does. Actor and singer Sheb Wooley was brought in to deliver some sound effects for the film during post-production, including the now iconic cry. But, Distant Drums has no character or person involved named Wilhelm, so did the name come to be? In 1953, the western film The Charge at Feather River used Warner Bros.'s anonymous sound byte. Fast forward to 1977 and a small film called Star Wars was about to be released, and some sound effects were still added. While searching for a scream to include, sound editor Ben Burtt discovered the hilarious cry labeled as Man Being Eaten by the Alligator. Burtt added the scream to the scene when Luke Skywalker pulls a Stormtrooper off an edge of the Death Star. After discovering and embedding the scream in Star Wars, Burtt began researching the origin of the scream. He's the one who found evidence that Wooley is responsible for the scream. But Burtt is also responsible for naming the scream after Private Wilhelm. The influence of Star Wars helped popularize Wilhelm Scream from this moment forward within the solid community. Burtt included him in the top six Star Wars movies, but the recent Star Wars films abandoned him. Lucasfilm's other great franchise, Indiana Jones, also has a tendency to use it, with Indiana Jones and Temple Doom taking the recurring joke to the next level of screaming game when alligators tear a man's body apart. Although there is no complete official list of every movie, TV show or video game that used Wilhelm Scream, it is believed that it can be heard in over 400 projects.
